Time: 1130 PST

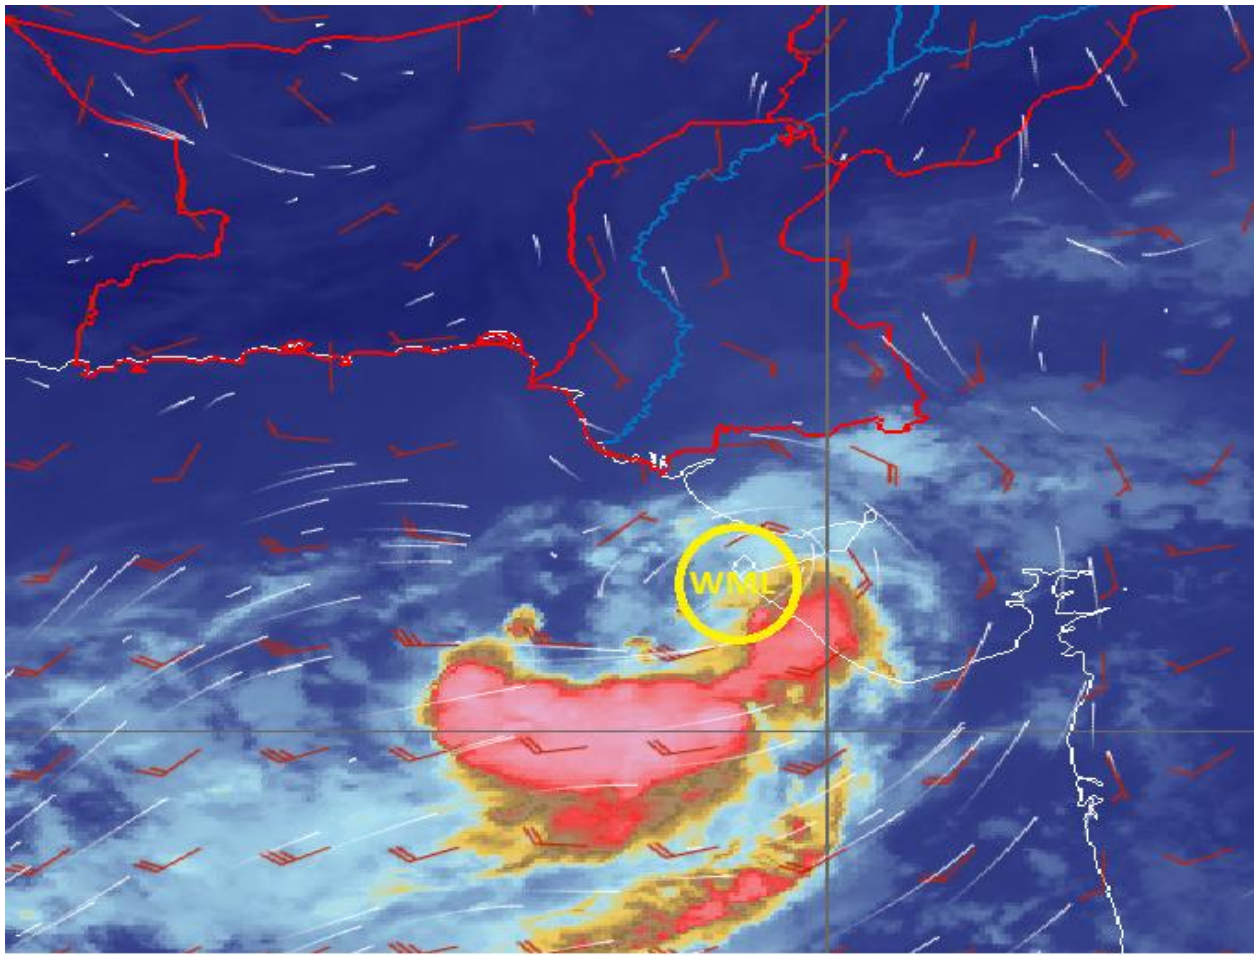

Well Marked Low-pressure Area over Saurashtra coast, Gujrat
(India)

The well-marked low-pressure area (WML) over Saurashtra coast and adjoining Gulf of Kuch, Gujrat (India) has moved westward and now lay over northeast Arabian Sea and adjoining Saurashtra coast, Gujrat (India) about 310Km southeast of Karachi. The system is likely to move westwards, intensify further into a depression during next 12hours over northeast Arabian Sea and move initially in west/southwest direction.

Under its influence, Wind-Thunderstorm/rain of light to moderate intensity likely in Tharparker, Umerkot, Sanghar, Mirpurkhas, Badin, Hyderabad, Jamshoro, Thatta, Sujawal, Tando Muhammad Khan, Tando Allayar, Matiari districts and Karachi Division today.

Sea conditions are likely to remain rough/very rough with squally winds 45-55 Km/hour. Fishermen of Sindh are advised not to venture into deep sea till 3rd October.

PMD's cyclone warning center, Karachi is monitoring the system and will issue the update accordingly. The concerned authorities are requested to keep them abreast through PMD advisory.
